

The image displays a large, empty grid table used for recording payroll data. The grid consists of approximately 28 columns and 100 rows. At the top center, the logo 'Tajomulco' is visible, with the subtitle 'REMUNERACIÓN 21. CULMINA DE OCTUBRE 2021' below it. The grid is designed to capture detailed employee information, likely including identification numbers, names, and various remuneration components for each day of the month. The columns are narrow and uniform in width, and the rows are also uniform in height, creating a dense array of cells for data entry.
